

Complex records. Clear evidence.

Cellular and geolocation analysis, courtroom presentations, and expert testimony. Support from the first records review through trial.

WHAT WE DO

01 Cellular records analysis

Interpret call detail records, historical cell site information, and timing advance data where available.

02 Maps and timelines

Compare record events with surveillance, license plate reader observations, and other supporting evidence.

03 Courtroom presentations

Develop clear maps, slides, and synchronized video presentations that connect technical records with the case timeline.

04 Expert testimony

Explain analytical methods, findings, and limitations. Prepare with counsel for clear presentation of technical evidence.

GROUNDING IN THE RECORDS

Independent analysis. Clear explanations of what the data supports and where its limits begin.
